The largest part of his life was devoted to the study of history, but at an early age inquiries into the nature of human progress led him to a careful study of the doctrine of evolution, and it was through the popularization of Charles Darwin s work that he first became known to the public. He applied himself to the philosophical interpretation of Darwin s work and produced many books and essays on this subject. His philosophy was influenced by Herbert Spencer s views on evolution. In a letter from Charles Darwin to John Fiske, dated from 1874, the naturalist remarks: I never in my life read so lucid an expositor (and therefore thinker) as you are. Later he turned to historical writings, publishing books such as *The Discovery of America* (1892, ISBN 1-932080-42-2). In addition, he edited, with James Grant Wilson, *Appletons Cyclopaedia of American Biography* (1887). He died, worn out by overwork, at Gloucester, Massachusetts, July 4, 1901. One of Fiske s best-known works is *Dutch and Quaker Colonies in America*, a comprehensive look at the earliest period of colonial America near the start of the 17th century.
