paperback. Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment.Pages Number: 10275 Publisher: Mechanical Industry Press Pub. Date: 2008 - 06. This book introduces the main signal processing methods and applications. The book is 10 chapters. including: preliminary functional analysis. Green s function. features solution methods. Taub Leeds and characteristics of the matrix solution method. interpolation. ill-posed problems and regularization method. moments and maximum entropy method. AR model Law and sub-AR model method. robustness (robust) method and spectral analysis and spectral estimation method s development. Book methods of mathematical physics and signal processing methods and applications tightly integrated content-rich. the concept of clear. very systematic. theory with practice. but also by more research. is quite distinctive. Book as a college senior and graduate students in teaching. in signal processing is also available for university teaching and technology officers. Contents: Preface Chapter 1 set and 1.1 set of preliminary functional analysis of the function that sets the definition 1.1.2 1.1.1 axiom system requirements set and a countable set of functions that set 1.1.3 1.2 1.2 linear space with the metric space .1 linear space metric space 1.3 1.2.2 1.3.1 Hilbert space of finite-dimensional vector space with inner product 1.3.2 norm normed linear space 1.3.3 The inner product space and Hilbert asked space projection theorem 1.4 1.5 functional and variational functional definition 1.5.1 1.5.2 1.5.3 variational functionals with equality constraints of the functional concept of extreme operators 1.6 1.7 Functions 1.7.1 The introduction of the function 1.7.2 generalized functions and the nature and function 8 1.7.3 Fourier transform function is a bounded functional and the weak convergence orderFour Satisfaction guaranteed,or money back.
