

Force-On-Force Police Training Using Airsoft: A Manual for the Law Enforcement Trainer on the Use of Airsoft Non-Lethal Technology (Paperback)

By Luis E Martinez Med

Outskirts Press, United States, 2008. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.In a gunfight, there s no second place winner. Airsoft is the new frontier in the field of reality-based law enforcement training. Police trainers owe it to the profession and to the safety of all warriors to develop and implement the very best training methods available . Police officers must be trained in realistic, real-life situations with scenarios that elevate the stress level to simulate reality- anything less is unfair to our officers and a disservice to the profession. Airsoft technology fills the gap between static, square range based training and the reality of a dynamic armed confrontation. The technology is easy to master, low cost, and provides a realism to force-on-force training that is difficult to surpass. Force-On-Force Police Training Using Airsoft introduces police trainers to the how-to of using these weapons, the various types available, technical data, and offers sound advice on the safety aspects of reality-based training. This book provides a complete training program and is an essential addition to the police use-of-force instructor s library.
