For the day-to-day DBA, there are dangers around every corner; monsters waiting to strike down the unsuspecting database with a resource-hungry query, an inefficient data load, or even outright data corruption. When the worst happens, and SQL Server is down, or performance is suffering, customers are quick to complain. . During such difficult periods, you, the DBA, are the centre of attention. Suddenly, three or four people crowd your desk, laser beam focused on your every action, fully expecting you to solve the problem quickly. Without verified backups, sound server documentation, and a ready supply of tried-and tested troubleshooting tools, there is no safe place to hide when the monster rears up.
