

Laboratory Experiments in General Chemistry (Classic Reprint)

By Herman Schlundt

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Laboratory Experiments in General Chemistry The experiments outlined in this manual are designed primarily for college students who have not had a course in chemistry in a preparatory school. The exercises represent the laboratory work of a comparatively brief introductory course in General Chemistry. The experiments are to be conducted under the guidance of an instructor, and are to be supplemented by class-room demonstrations in connection with recitations from a text-book in General Chemistry for college students, or by illustrated lectures and text-book assignments. Frequently the experiments do not furnish sufficient information to enable the student to answer some of the questions and make the explanations that are to appear in his notebook. The necessary information can generally be obtained from the text-book, and it is my plan to have the student use the text-book and laboratory outline as companion volumes in the laboratory. To facilitate the students progress in this connection page references to two widely used texts have been inserted. My experience goes to show that the student will thus make very efficient..
