Technics Publications. Paperback. Condition: New. 190 pages. This is the single best book every written on data quality. Clear, concise and actionable. We all want to leverage our data resources to drive growth, but we too often ignore the fundamentals of data quality which almost always inhibits our success. Tom lays out a clear path for each organization can take to holistically improve not only its data quality, but more important the performance of your business as a whole. --Jeffrey G. McMillan, Chief Analytics and Data Officer, Morgan StanleyThis book lays out the roles everyone, up and down the organization chart, can and must play to ensure that data is up to the demands of its use, in day-in, day-out work, decision-making, planning, and analytics. By now, everyone knows that bad data extorts an enormous toll, adding huge (though often hidden) costs, and making it more difficult to make good decisions and leverage advanced analyses. While the problems are pervasive and insidious, they are also solvable! As Tom Redman, the Data Doc, explains in Getting in Front on Data, the secret lies in getting the right people in the right roles to get in front of the management and social issues that lead to bad data in the first place. Everyone should see himself or herself in this book. We are all both data customers and creators--Getting in Front on Data proposes new roles for data professionals as: embedded data managers, in helping data customers and creators complete their work, DQ team leads, in connecting customers and creators, pulling the entire program together, and training people on their new roles, data maestros, in providing deep expertise on the really tough problems, chief data architects, in establishing common data definitions, and technologists, in increasing scale and decreasing unit cost. Data...
