

## The Topology of CW Complexes

Filesize: 7.85 MB

### **Reviews**

*Merely no phrases to describe. It really is rally intriguing throgh reading time. I am happy to tell you that this is basically the greatest book i have go through in my own lifestyle and might be he greatest book for ever.*  
**(Kattie Wunsch)**

## THE TOPOLOGY OF CW COMPLEXES

To download **The Topology of CW Complexes** PDF, remember to access the hyperlink under and download the document or have access to other information which might be in conjunction with THE TOPOLOGY OF CW COMPLEXES book.

Book Condition: New. Publisher/Verlag: Springer, Berlin | Most texts on algebraic topology emphasize homological algebra, with topological considerations limited to a few propositions about the geometry of simplicial complexes. There is much to be gained however, by using the more sophisticated concept of cell (CW) complex. Even for simple computations, this concept ordinarily allows us to bypass much tedious algebra and often gives geometric insight into the homology and homotopy theory of a space. For example, the easiest way to calculate and interpret the homology of  $C_p^n$ , complex projective  $n$ -space, is by means of a cellular decomposition with only  $n+1$  cells. Also, by a suitable construction we can "realize" the singular complex of a space as a CW complex and perhaps thus give a more geometric basis for some arguments involving singular homology theory for general spaces and a more concrete basis for singular homotopy type. As a final example, if we start with the category of simplicial complexes and maps, common topological constructions such as the formation of product spaces, identification spaces, and adjunction spaces lead us often into the category of CW complexes. These topics, among others, are usually not treated thoroughly in a standard text, and the interested student must find them scattered through the literature. This book is a study of CW complexes. It is intended to supplement and be used concurrently with a standard text on algebraic topology. | 0. Preliminaries.- I. Combinatorial Cell Complexes.- 1. Definitions.- 2. Examples.- 3. Carrier theory.- 4. Functions.- 5. Product complexes.- 6. Equivalence relations and quotients.- 7. Adjunction complexes.- II. CW Complexes.- 1. Definitions.- 2. Alternative descriptions of CW complexes.- 3. Remarks on the general topology of CW complexes.- 4. Paracompactness.- 5. Products, quotients, and adjunctions.- 6. Homotopy and local properties.- 7. The homotopy extension...
