Briza, South Africa, 2007. Paperback. Condition: New. Language: N/A. Brand New Book. The worldwide trend towards smaller houses and spaces and apartment type homes has inspired and demanded a new approach in gardening. This is due predominantly to the freedom of expression in the styling and use of outdoor spaces, the approach to hard landscaping and the use of plant material most suited to the environment, house or garden design and style. The trend is to introduce hard landscaping and plant material natural to the local area, gravel as a substitute for lawn in small spaces, a sense of fun and the unexpected in the use of plants or accessories. This is what makes gardening a pleasure and one of the finest creative arts there is. The author horticulturist, shares his vast local and international experience and knowledge with his readers in this title on small gardens - from the initial design, the preparation, the hard landscaping elements, container gardening, water, maintenance, garden chores for every month of the year, food and herb gardening, to lists of plants suitable for smaller spaces. Breathtakingly beautiful photos not only illustrate the information, but are artworks in their own right providing a pool of inspirational ideas.
