Excerpt from **The Story of River Gold and Its Recovery: The Demand for Gold; Origin of River Gold; British Columbia s Wealth in River Gold; The World s Gold Production; Methods Employed in Recovering Gold**; Reminiscences of the Gold Fields When the Pan has been filled with gravel or whatever soil was in the bedrock, it would be taken to a convenient pool, stream or even tub, and dipped into the water in such a manner as to take up sufficient water to sluice off the heavier material. This was then thrown out. The process was repeated until nothing remained in the pan except a little fine sand sparkling with particles of gold. This was carefully dried in an iron vessel and the sand blown away, leaving the pure gold. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
