

Pollen Morphology of Some medicinally important herbal species

By Yousaf, Zubaida / Akram, Ana

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | From tropical and subtropical regions of Pakistan | There are many disciplines associated with taxonomy which are used by taxonomists as an aid or to improve the identification, classification and to remove existing taxonomic confusions. Among these disciplines palynology is one of the most significant tool used by modern taxonomists to identify and differentiate closely related taxa. Pollen characters have received great attention in taxonomic classification as they show more stability in their characters than morphology. The significance of pollen morphology in plant systematic has been stressed by a number of workers to delineate different taxa in terms of phylogenetic and taxonomic consideration. This monograph will shed some light on pollen morphology of medicinally important herbal flora of tropical and subtropical regions, and will be source of useful information not only for taxonomist but also for the people related to herbal pharmaceutical industries. | Format: Paperback | Language/Sprache: english | 96 pp.

Reviews

Good e-book and helpful one. It can be written in basic phrases rather than confusing. I realized this ebook from my i and dad recommended this book to find out.
