

Progress in Artificial Intelligence

By Lua-S. Seabra Lopes

Springer-Verlag GmbH Sep 2009, 2009. Taschenbuch. Condition: Neu. Neuware -

The 14th Portuguese Conference on Artificial Intelligence, EPIA 2009, took place at Hotel Meliá Ria, in Aveiro, Portugal, in October 12-15, 2009. This international conference was organized by the University of Aveiro and, as in previous years, was held under the auspices of the Portuguese Association for Artificial Intelligence (APPIA). The purpose of EPIA 2009 was to promote research in all areas of Artificial Intelligence (AI), covering both theoretical/foundational issues and applications, and to encourage the scientific exchange among researchers, engineers and practitioners in related disciplines. To promote discussions among participants, EPIA 2009 was structured as a set of thematic tracks proposed by the international AI research community. Thematic tracks are intended to provide an informal environment that fosters the active cross-fertilization of ideas between researchers within specific areas of AI, including theoretical/foundational, integrative, application-oriented and newly emerging areas. The proposals received in response to a public call for Thematic Tracks were evaluated by the Program Chair and the General Chairs in consultation with the Advisory Committee. The following tracks were selected and included in the conference program: AITUM Artificial Intelligence in Transportation and Urban Mobility ALEA Artificial Life and Evolutionary Algorithms CMBSB Computational Methods in Bioinformatics and Systems Biology COLA Computational Logic with Applications EAC Emotional and Affective Computing GAI General Artificial Intelligence IROBOT Intelligent...
