COMPUTATIONAL COGNITIVE MODELING OF CONTROL IN SPATIAL COGNITION

Wolfgang Science Pabst Nov 2009, 2009. Taschenbuch. Condition: Neu. Neuware - Spatial cognition, that is, the ability to mentally process spatial information, is crucial in various domains of human endeavor. Navigating the immediate surroundings, planning a trip to and in non-immediate environments, and executing directed movements are only some examples of activities requiring spatial cognition. As in all cognition, spatial cognition requires control, that is, means to ensure a coherent functioning of those components of the human mind which are...
