### **Reviews**

*The very best publication i at any time study. It really is basic but shocks inside the fifty percent of the ebook. It is extremely difficult to leave it before concluding, once you begin to read the book.*

Oxford University Press, United Kingdom, 2014. Hardback. Condition: New. 3rd Revised edition. Language: English . Brand New Book. The third edition of this definitive and highly-regarded reference work provides a comprehensive review of vasculitis, a fascinating array of life-threatening and minor conditions caused by inflammatory syndromes and diseases that affect the blood vessels. The text uniquely brings together concepts from both the biological and clinical aspects of vasculitis. Research in clinical immunology now invigorates the entire area of vasculitis and shapes a rational approach to pathogenesis, diagnosis, and treatment, which is the substance of this text. Over 40 chapters cover known vasculitic conditions, and are illustrated with over 250 full-colour photographs of clinical and pathologic findings, diagrams, and tables. Separate sections are devoted to basic science, clinical manifestations commonly seen in vasculitis, imaging and percutaneous interventions, individual diseases and syndromes, as well as conditions which can mimic vasculitis. Many of the conditions are rare, and it is the exceptional clinician who has much experience with more than a few of these; thus, the invaluable experience of the international team of authors makes this edition truly indispensable. Now in the Oxford Textbooks in Rheumatology series, this new edition of Vasculitis is published with a concurrent online version, which features access to the full content of the textbook, contains links from the references to primary research journal articles, allows full text searches, and provides access to figures and tables that can be downloaded to PowerPoint. This volume is the definitive reference for rheumatologists, clinical immunologists, and general internists, and will also be of interest to dermatologists, gastroenterologists, cardiologists, pulmonologists, nephrologists, neurologists, pathologists, vascular surgeons, and pediatricians.
