SUSTAINABLE AQUAPONICS RECIRCULATION SYSTEM FOR FRESHWATER SPECIES

Azizah Endut
Fathurrahman Lananan
Sustainable Aquaponics
Recirculation System for
Freshwater Species

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | The integration of hydroponics plant production into recirculating aquaculture system namely aquaponics appears to be an excellent way of saving water, improve waste management as well as an amazing productive way to grow organic vegetables, while providing fresh fish as a safe and healthy source of protein. This book was written to provide a comprehensive guide for successful aquaponics recirculation system as the design protocol for the development of an economically feasible...

Reviews

This pdf may be worth acquiring. It can be written in easy words and phrases and not hard to understand. I am pleased to tell you that this is basically the finest book i have read through during my personal existence and might be the greatest pdf for at any time.

A very amazing publication with perfect and lucid information. We have read through and that i am certain that i will planning to study once more yet again in the future. You will not really feel monotony at anytime of the time (that's what catalogues are for about should you question me).
