PLASMA SOLAR, SPIRITUAL HUMAN: ILLUSTRATED SCIENCE

Createspace Independent Publishing Platform, United States, 2016. Paperback. Book Condition: New. Illustrated. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Plasma in the physical universe is as challenging in perception as the spiritual domain in human sphere. Both are invisible, except by their effects. And often, the effects too, are hard to recognize. In cosmic space, plasma streams have resonance cycles according to their physical size. On the galactic scale the resonances are measured in millions of years per cycle, such as the 31 and 145 million-year cycles. Both are presently at their low point, and overlapping. That's why we have to deal with Ice Age cycles that become critical during low-density plasma conditions in the galaxy. And this is where we are at today. With the Ice Age Challenge now before us, we face two imperatives. One is to understand the physical dynamics, and to create the physical infrastructures that enable human living to continue in an Ice Age climate. The second challenge is to raise up our humanity to such height as will impel us to get the job done. Some say that miracles are needed on both fronts. But what of it? Are we, as human beings, not the miracle makers on the Earth? In the real universe, the cosmic operations are anti-entropic in nature, and expanding and progressing. We, ourselves are evidence of this progression. Should this progression have ended? Neither is our Sun isolated from the progressive nature of the universe, but expresses its dynamics, its resonating plasma streams, and their reflection in the climate on Earth. Shouldn't we develop ourselves spiritually and culturally, likewise? Climate Change reflects the nature of the universe. It should also be reflected in us. The Earth itself is the creation of the Sun,...
