Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Bulletin of the Scientific Laboratories of Denison University, Vol. 15 In these days when philosophy is considered less and less as transcendental metaphysics and more and more in terms of the instrumental methodology of the sciences, the thoughts and writings of men who represent this phase of human endeavor. are coming to be valued above every other source of philosophical inspiration, The opinions of such men as Tyndall, Huxley, Helmholtz, Kelvin, Mach, Ostwald, to mention no others, become of great significance to philosophy when the latter is conceived as an interpretation and criticism of the underlying principles and methods of the sciences. It is as a contribution to this increasingly valuable literature that these pages are offered to the public. Professor Herrick was not only an eminent naturalist and neurologist, but from the first he conceived and executed his researches in a philosophic spirit and with the special problems of psychology in mind. This fact in itself would make his views of interest. But when to this the fact is added that his ideas are always expressed vivaciously and in suggestive form, his writings become doubly interesting and important. An account of the life and work of Prof. Clarence Luther Herrick, with portrait and an appended bibliography, may be found in the Journal of Comparative Neurology and Psychology¹ and more fully in the Bulletin Of The Scientific Laboratories of Denison University.² About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
