FROM WASTE TO VALUE

Cuvillier Verlag Jun 2013, 2013. Taschenbuch. Condition: Neu. Neuware - For the first time, 1,5-diaminopentane (polyamide monomer) production from xylose was achieved by a recombinant *Corynebacterium glutamicum* strain. Via rational metabolic engineering the product yield was increased by 54% and the productivity by 100%. The tailor-made strain finally accumulated 103 g L⁻¹ diaminopentane in a fed-batch fermentation, the highest titer ever obtained on xylose. In a two-step process hemicellulose was used as substrate. The monosaccharides were first obtained by hydrolysis...
