LAP Lambert Academic Publishing Aug 2015, 2015. Taschenbuch. Book Condition: Neu. 220x150x8 mm. This item is printed on demand - Print on Demand Neuware - The importance of low dimensional silicon nanostructures are rapidly increasing in the fields of material research and technological applications. It is well known that silicon is a dominating material in microelectronics but not a suitable material for optoelectronics due to its indirect band-gap nature. So the main objective is to overcome these difficulties by getting...
