Taylor Francis Inc, United Kingdom, 2002. Paperback. Condition: New. New edition. Language: English . Brand New Book. Here Hans Eysenck applies the principles of modern learning theory to account for the observed phenomena of hysteria and anxiety. Such principles were initially developed through the experiments and theories of Pavlov, Hull, and Tolman. When *The Dynamics of Anxiety and Hysteria* initially appeared, these were considered the most advanced, relevant, and applicable to the subject matter. They have not been superseded by later work. *The Dynamics of Anxiety and Hysteria* has never been published in the United States. It was the fifth book Eysenck authored as part of a series of experimental studies and theoretical work carried out under the auspices of the Institute of Psychiatry at the University of London. Eysenck scientifically explores such topics as learning theory and human behavior, personality and learning theory; personality and perceptual processes, socialization and personality, drugs and personality, and psychological theory and psychiatric practice. This volume, which complements Transaction's other new editions of Eysenck's groundbreaking work, will be of lasting significance to psychologists, psychiatrists, behaviorists, and students of personality disorders. He provided for modern psychology the empirical foundations of themes that previously were the monopoly of psychoanalysis. Hans J. Eysenck (1916-1997), a professor of psychology at the University of London and the director of its psychological department at the Institute of Psychiatry, was best known for his experimental researches in the field of personality. He was a...
