## ENTERPRISE APPLICATION DEVELOPMENT WITH EXTJS AND SPRING

[DOWNLOAD](#)

Packt Publishing Limited. Paperback. Condition: New. This item is printed on demand. 446 pages. Develop and deploy a high-performance Java web application using Ext JS and Spring Overview Embark on the exciting journey through the entire enterprise web application development lifecycle Leverage key Spring Framework concepts to deliver comprehensive and concise Java code Build a real world ExtJS web application that interacts with dynamic database driven data In Detail Spring and ExtJS are cutting edge frameworks that allow us to build high performance web applications for modern devices, that are now consuming data at a faster rate than ever before. It is the appropriate time for you to understand how to best leverage these technologies when architecting, designing, and developing large scale web development projects. This practical guide condenses an approach to web development that was gained from real world projects, and outlines a simple, practical approach to developing high performance, and enterprise grade web applications. Starting with configuring Java, Netbeans, and MySQL to prepare your development environment, you will then learn how to connect your Netbeans IDE to the MySQL database server. We will then explore the Task Time Tracker (3T) project database structure and populate these tables with test data. Following on from this, we will examine core JPA concepts after reverse engineering the domain layer with Netbeans. Leveraging the Data Access Object design pattern, you will learn how to build the Java DAO implementation layer assisted by generics in base classes, followed by a Data Transfer Object enabled service layer to encapsulate the business logic of your 3T application. The final chapters that focus on Java explore how to implement the request handling layer using Spring annotated controllers, and deploy the 3T application to the Glassfish server. We will then configure the ExtJS 4 development environment and...
