*An incredibly wonderful ebook with perfect and lucid explanations. I really could comprehend every little thing using this written publication. It is extremely difficult to leave it before concluding, once you begin to read the book.

It is 2076: Lancer, Earth's first starship, is on a mission to find interstellar civilizations. Although astronaut Nigel Walmsley's experiences with alien encounters make him the expert, no one believes Nigel's theory that machines are the dominant intelligent beings left in the galaxy and that their purpose is to annihilate all organic life. Then the explorers discover once-living planets where only machines remain and ruined worlds where fugitive survivors must evade omnipresent and lethally advanced A.I. warships. By the time the crew of Lancer realizes that Nigel is right, it will be too late for the machines have already found Lancer and Earth.
