Wyss (Zur Kasuistik der primären Darmtuberkulose im Kindesalter, Correspondenzblatt f. Schweizerärzte, 1893, No. 22) found in seventy-one postmortems on children three instances of undoubted primary intestinal tuberculosis. In one case, a girl of five and three-fourths years old, who had died of diphtheria, a solitary tubercular ulcer was found in the ileum, with extensive tuberculosis of the mesenteric glands. No trace of tuberculosis could be detected in any other organ. Upon inquiry it was ascertained that the child had been fed on milk almost exclusively for some time before she had contracted diphtheria. In the other two cases the disease could be traced to the same cause. Such evidence as this, concerning the etiology of a disease which has such terrible results must at least cause us to ask ourselves the question, Is there danger in the use of meat and milk? If the evidence is not strong enough to cause us to abandon the use of these substances as food, it must at least compel us to see the necessity of rendering them aseptic before introducing them into the stomach. c. E. s. part in the cause of temperance, and wrote several important papers relating to the pathological action of alcohol in health and disease. The American Medical Temperance Association has been in existence since May, 1891. Dr. Quimby was one of the founders of this association, and has, since its foundation, been an active and...
