

## Echocardiography in Acute Myocardial Infarction

Filesize: 1.7 MB

### **Reviews**

*This is an amazing book that I actually have actually read through. I am quite late in start reading this one, but better then never. You will not truly feel monotony at anytime of the time (that's what catalogs are for concerning should you ask me).

## ECHOCARDIOGRAPHY IN ACUTE MYOCARDIAL INFARCTION

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Remodeling of left ventricle and diastolic dysfunction | Acute myocardial infarction (AMI) resulting change in the size and shape of left ventricle (LV). Aim- to determine whether parameters of echocardiography are important in AIM in predicting LV remodeling and in prediction of adverse cardiovascular events after AMI. Methods- The study included 70 patients with AMI. Patients were examined the clinical, laboratory and ECHO (two-dimensional, pulsed and tissue doppler) and angiographic and reviewed after 30 days. The outcomes were: death, reinfarction, or heart failure (HF). Results- ECHO findings showed reduced systolic and diastolic LV function in the first 24 hours of AMI, while the E/Ea manifest high values 9, After 30 days volumes increase in enddiastole and endsystole 18,6% patients had an ejection fraction (EF) 8 After 30 days 2D ECHO demonstrated that the HF significantly higher in patients with an increased dimensions and volume LV , an enlarged left atrium, mitral regurgitation and low EF, higher E wave and lower septal S Conclusion- ECHO parameters have prognostic significance in predicting recovery of LV after early reperfusion therapy and in predicting adverse events. | Format: Paperback | Language/Sprache: english | 120 pp.
