Excerpt from Annual Abstract of Therapeutics, Materia Medica, Pharmacy and Toxicology, for 1867: Followed by an Original Memoir on Gout, Gravel, and Urinary Calculi The selections, it will be observed, have been made by Professor Bouchardat, mainly with a view to the useful information they convey, mere theoretical abstractions being omitted, as not in conformity with the nature of the work; still, where scientific questions embody points of clinical value, or where they furnish a basis upon which practical induction may be founded, they have not been excluded. The work, therefore, is addressed to the requirements of physicians whose engagements do not permit of their searching over the immense field from which these fruits have been gathered; to practitioners in the country, as conveying the results of the active labors of the toilers in our profession; and to medical editors' preface.
