Brand New Book ***** Print on Demand *****.Excerpt from The Foundation of American Dermatology: Being the President's Address at the Fourth Annual Meeting of the American Dermatological Association Held at Newport R. I., August 31, 1880 The year 1870 is, moreover, memorable for the arrival in Boston of a valuable dermatological museum, consisting of duplicates of the more important models in the Hopital St. Louis, Paris. The collection was purchased by Dr. Wigglesworth, and consists of many beautiful representations of disease from the hand of the well-known artist, M. Baretta. There are one hundred and seventy-nine models; of these, one hundred and thirty-four portray non-syphilitic and forty-five syphilitic diseases of the skin. Among the rarer affections, four examples of peculiar forms of scrofuloderma, six of lupus, three of lymphangitis, one of pityriasis rubra, and one of that but little understood disease called by the French mycosis fungoide, may be noted. The last mentioned model shows the head, arm, and forearm, and anterior surface of the trunk, which regions are the seat of variously sized, apparently soft, flat and prominently-raised, smooth and scaly, circumscribed and diffused, pinkish, fungoid tumors, tubercles,...
