This book focuses on one of those sciences, which is studying the names of the chapters (suras) of the Qur an. It explains where each chapter name has come from and tries to identify naming patterns. The book is divided into two main parts. The first contains seven chapters each of which focuses on certain elements of the subject. The second part analyzes in detail the name of each of the 114 Quranic chapters. Among the topics it covers: - An introduction to the Qur an. - Hadiths in which the Prophet refers to chapters by their names. - Chapters that have two names. - The Quranic origin of the chapter names. - Where the names appear in their respective chapters. - Categorization of the meanings of the chapter names.
