

The Flying-Machine from an Engineering Standpoint; A Reprint of the James Forrest Lecture, 1914, by Permission of the Institution of Civil Engineers, Including a Discussion Concerning the Theory of Sustentation and the Expenditure

Filesize: 5.58 MB

Reviews

Without doubt, this is the very best function by any writer. It typically will not charge too much. I discovered this publication from my dad and i encouraged this pdf to discover.

To save **The Flying-Machine from an Engineering Standpoint; A Reprint of the James Forrest Lecture, 1914, by Permission of the Institution of Civil Engineers, Including a Discussion Concerning the Theory of Sustentation and the Expenditure** PDF, you should click the hyperlink under and download the ebook or gain access to other information which are have conjunction with THE FLYING-MACHINE FROM AN ENGINEERING STANDPOINT; A REPRINT OF THE JAMES FORREST LECTURE, 1914, BY PERMISSION OF THE INSTITUTION OF CIVIL ENGINEERS, INCLUDING A DISCUSSION CONCERNING THE THEORY OF SUSTENTATION AND THE EXPENDITURE book.

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1917 edition. Excerpt: .Aerodynamic Laboratory at Gottingen, and by M. F. Eiffel, in Paris. A few results relating to strut sections are given in Fig. 31a. The graph a a is a plotting from National Physical Laboratory data,² relating to the section A, 1 Report of the Advisory Committee for Aeronautios, 1912-1913, No. 83. Report of the Advisory Committee for Aeronautios, 1912-1913, p. 111. representing one of the best forms tested, graphs b and c relating to sections B and C as determined by M. Eiffel.¹ In Fig. 31a ordinates represent resistance coefficient both in absolute units and in terms of normal plane (the normal plane unit being that of maximum section). In Fig. 316 are shown two strut-sections designed at the Royal Aircraft Factory. These were reported upon by the N.P.L. as giving less resistance for given strength than a number of others submitted. Approximately, strength for strength, Fio. 31a. these gave one-fourth the resistance of struts of circular section.² The resistance of wires and ropes has been investigated both by the National Physical Laboratory and by Professor Prandtl of Gottingen. The position may be summarized here by saying that the resistance of a rope or stranded cable, at right angles to the direction of motion, is virtually equal to that of its area projected on a normal plane. The resistance of smooth wires is about 20 per cent. less. Both these results only hold good above a certain minimum value of LV, which may be...
