## The Chemical Trade Journal, Vol. 1: A Weekly Newspaper Devoted to the Commercial Aspect of the Chemical and Allied Industries; May to December, 1887 (Classic Reprint) (Paperback)

By George E Davis

Forgotten Books, 2016. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. Excerpt from The Chemical Trade Journal, Vol. 1: A Weekly Newspaper Devoted to the Commercial Aspect of the Chemical and Allied Industries; May to December, 1887 Lancashire Sulphur and Alkali Compan and it remains yet to be seen whether the combination of such intricate processes will be profitable. In the same month Mr. Ludwig Mond obtained protection for a method of obtaining ammonia, and either hydrochloric acid or chlorine from ammonium chloride, by bringing the latter in contact with the protoxide of nickel, or one or several of the oxides of cobalt, magnesium, zinc, copper, iron, manganese, aluminium, bismuth, or other heavy metals possessing similar chemical properties. It is said in the specification that the chlorine is retained, forming a chloride or oxychloride, while the ammonia passes on to be absorbed in suitable apparatus. Now comes the critical portion of the process. After sweeping out the rest ammonia by means of an inert gas, superheated steam is passed through, whereby hydrochloric acid passes off and the metallic oxides reformed. If chlorine is required, after sweeping out...
