A professor from Mars University hires your band of shady vagabonds to search Jupiter's moons for alien artifacts. Strange, though -- that isn't the sort of job RAM subcontracts. Is the professor pursuing a proscribed area of inquiry? Or is he just a crackpot who can't engage a reputable salvage company. It's a moot point, since after a "chance" encounter with a sultry Terran known as Matahari, they'll be too busy to get anywhere near Jupiter. A murderous computer program named Rutgar.dos will sabotage their ship. A confederation of savage pirates will abduct them. The captivating Ardale Valmar will invite them to be her permanent guests....
