NEWTONS PRINCIPIA SECTIONS WITH NOTES AND ILLUSTRATIONS: ALSO A COLLECTION OF PROBLEMS PRINCIPALLY INTENDED AS EXAMPLES OF NEWTONS METHODS (CLASSIC REPRINT)

Forgotten Books. Paperback. Condition: New. 312 pages. Dimensions: 8.9in. x 6.0in. x 1.0in. Thompson, Tait, and Maxwell, whose works are in everybodys hands, and partly because in the course of reading recommended to students, for whose benefit my work was especially intended, those laws will have been already discussed in the elementary treatises on Dynamics. The Problems are principally selected from the papers set in the Mathematical Tripos, and in the course of the College Examinations, and I have generally divided them into two portions, the first of which contains those problems which are capable of solution by more direct applications of the propositions which they illustrate, and are within the powers of a larger number of students. In both portions I have been careful to introduce very few problems which are not capable of solution by methods given in the work. At the end of the work I have given hints for the solution, and in many cases complete solutions, of the problems; and in doing so I am acting in direct opposition to my previously expressed opinion, but additional experience of fifteen years has shewn me that it is a satisfaction to a student who has not been able to solve a problem to see a solution of it; and, even when he has been successful, to compare his solution with that of an older hand.
