Excerpt from Practical Dynamo Building for Amateurs: A Practical Treatise Showing the Construction and Winding of an Experimental Fifty Watt Dynamo Being very small and light, they are especially valuable in class work, and are used for this purpose in some of the colleges and schools. The complete dynamo weighs but little more than five pounds, and is small enough to be passed around at a lecture as a practical illustration. At many of the Manual Training Schools and State Colleges, the construction and winding of these little dynamos has formed a portion of the shop work of the students.
