

Beginning Java Objects: From Concepts to Code

By Jacquie Barker

Apress. Paperback. Condition: New. 1000 pages. Dimensions: 9.2in. x 7.0in. x 2.0in. Learning to design objects effectively with Java is the goal of Beginning Java Objects: From Concepts to Code, Second Edition. Plenty of titles dig into the Java language in massive detail, but this one takes the unique approach of stepping back and looking at fundamental object concepts first. Mastery of Java from understanding the basic language features to building complete industrial-strength Java applications emerges only after a thorough tour of thinking in objects. The first edition of Beginning Java Objects has been a bestseller; this second edition includes material on the key features of J2SE 5, conceptual introductions to JDBC and J2EE, and an in-depth treatment of the critical design principles of model-data layer separation and model-view separation. Despite the plethora of beginning Java titles on the market, this book is truly unique in its coverage of three critical topics: object concepts, UML modeling, and Java programming within a single cover. Its ideal for both individual self-study and as a university-level textbook. Let Beginning Java Objects, Second Edition be your guide! This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
