

Edible Medicines: An Ethnopharmacology of Food

By Nina L. Etkin

University of Arizona Press. Paperback. Condition: New. 304 pages. Dimensions: 8.9in. x 6.0in. x 0.8in. Chile pepper is used today as a flavoring, but Aztecs also applied it for toothache, sore throat, and asthma. The tonic properties of coffee have been recorded in Islamic pharmacopoeia since the eleventh century, and many peoples have used it to protect against Parkinsons disease. Although much has been documented regarding the nutritional values of foods, until recently little attention has been paid to the pharmacologic potential of diet. This book investigates the health implications of foods from the cuisines of peoples around the world to describe the place of food in health maintenance. In this wide-ranging book, Nina Etkin reveals the pharmacologic potential of foods in the specific cultural contexts in which they are used. Incorporating co-evolution with a biocultural perspective, she addresses some of the physiological effects of foods across cultures and through history while taking into account both the complex dynamics of food choice and the blurred distinctions between food and medicine. Showing that food choice is more closely linked to health than is commonly thought, she helps us to understand the health implications of peoples food-centered actions in the context of real-life...
