A Contribution to the Physical Analysis of the Phenomena of Absorption of Liquids by Animal Tissues (Classic Reprint) (Hardback)

By Ralph W Webster

Forgotten Books, 2018. Hardback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from A Contribution to the Physical Analysis of the Phenomena of Absorption of Liquids by Animal Tissues Van t Hoff, applying certain facts brought out by Traube and Pfeffer regarding the influence Of semi-permeable membranes upon processes of osmosis, Showed that substances in solution Obey the ordinary laws Of gases, as brought forth by Boyle, Henry, Gay-Lussac, and Avogadro. In consequence Of this similarity between gases and substances in solution, the latter will exert a pressure upon the walls Of a containing vessel equal to the pressure which the dissolved substance would exert were it present in the gaseous form under the same conditions Of temperature and molecular aggregation. Whether this pressure, which van t Hoff calls osmotic pressure, be due to the impacts Of the dissolved particles against the walls Of the containing vessel, as the kinetic theory Of gases would demand, or whether it be an expression Of the attraction Of the dissolved particles for water, concerns us, in these experiments, only in so far as our work has to do with the dynamics Of the process Of absorption. About...

Reviews

The ideal publication i ever read through. It is written in simple words and never hard to understand. Your daily life span is going to be converted once you fully look over this ebook.

-- **Tanner Willms PhD**

This sort of ebook is everything and made me hunting ahead of time and more. I am quite late in starting reading this one, but better than never. I found out this publication from my dad and I suggested this publication to discover.
