MS ACCESS 2013 SQL COMPREHENSIVE

To get **MS Access 2013 SQL Comprehensive** PDF, please refer to the hyperlink below and save the document or get access to additional information which might be have conjunction with MS ACCESS 2013 SQL COMPREHENSIVE ebook.

AlphaPress. Paperback. Condition: New. 476 pages. Dimensions: 11.0in. x 8.5in. x 1.1in. This book is primarily intended for a training or educational environment in a College, University, or technical school. It has two specific goals: The first one is to train the student on Access SQL from its most basic statements to the level of a skilled professional. The second and equally important is to expose the student to the usage of SQL in the business world. That is why all the examples have a business purpose such as inventory replenishment, order reporting, shipping calculations, customer segmentation, cycle-time calculations and a myriad of other business related topics. As such, this book will be a very good fit for an MIS class in a business school. To that purpose it contains more than 300 exercises in its 31 chapters which the student can complete during class time. It also contains ten questions after each chapter which the instructor can use for in class discussions or test generation. There are 320 questions in total in the book. Finally, it contains sixty-two case studies, two at the end of each chapter, for additional work as homework or for sharpening the skills learned in each chapter. The book is the culmination of Pindaros 15 years of teaching on various database subjects at the University level in three different business schools. He taught at all levels, from freshmen to executives with all the inherited fun and challenges. After hundreds of labs and thousands of questions and comments from the students, Pindaro wrote this book to assist the students in becoming SQL experts so that they can be absolutely successful with their manipulation of data in the working environment. Currently, no matter the position, industry, or job function, it looks like everyone is asking for SQL skills....
