Excerpt from English Political Institutions: An Introductory Study This book is intended as an introduction to the study of English Politics, but its scope is virtually limited to one section of the subject. It deals only with the structure of the State and the functions of the several organs of government. With abstract political philosophy it is not concerned, nor will there be found here any discussion of the conception or the functions of the State in general. My primary object has been to set forth the actual working of the English Constitution of to-day, and to do so with constant reference to the history of the past. I hope, therefore, that the book may be found to fulfil a twofold purpose: to provide an introduction to the history of English Institutions, and also to explain the contemporary working of the complicated constitutional machine. The book is in fact based upon lectures which have already, I hope, fulfilled in some measure these purposes. Those lectures have been addressed, in forms varied to suit varying circumstances, to audiences of widely different types: to Oxford undergraduates entering upon their course of study for the Honour School of Modern History; to foreign teachers of many nationalities desirous to obtain a synoptic view of the working of English Institutions, and to working-men in several centres of Industry, in the hope of inducing them to undertake a more scientific study of Politics, in the strict sense of the term.
