

Clinical Report on Cases of Lacerated Cervix, and Ovariectomy, from Private Practice (Classic Reprint) (Paperback)

By Joseph H Warren

Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Clinical Report on Cases of Lacerated Cervix, and Ovariectomy, From Private Practice From observations of over twenty-five years I have learned that lacerations of the cervix uteri occur much more frequently and extensively on the right side than on the left, but that when both sides are lacerated the left is usually torn more than the right. The most natural question is, Why should this laceration occur so much more frequently and extensively on the right than on the left side and to this question I can give no other answer than that, in many cases at least, the laceration is due to bad and meddling midwifery. I do not mean that the obstetrician should never interfere with the progress of a labor when by such interference he may render the necessary assistance that is all-important to the successful termination of a labor that is already unduly protracted; nor do I mean that the accoucheur should be blamed if in rendering such necessary assistance he consciously or unconsciously lacerates either the cervix or the perinaeum. A laceration in...
