O'Reilly Media, Inc, USA, United States, 2007. Paperback. Book Condition: New. 232 x 180 mm. Language: English . Brand New Book. How do the experts solve difficult problems in software development? In this unique and insightful book, leading computer scientists offer case studies that reveal how they found unusual, carefully designed solutions to high-profile projects. You will be able to look over the shoulder of major coding and design experts to see problems through their eyes. This is not simply another design patterns book, or another software engineering treatise on the right and wrong way to do things. The authors think aloud as they work through their projects architecture, the tradeoffs made in its construction, and when it was important to break rules. Beautiful Code is an opportunity for master coders to tell their story. All author royalties will be donated to Amnesty International. The book includes the following contributions: Beautiful Brevity: Rob Pike's Regular Expression Matcher by Brian Kernighan, Department of Computer Science, Princeton University; Subversion's Delta Editor: Interface as Ontology by Karl Fogel, editor of , Co-founder of Cyclic Software, the first company offering commercial CVS support; The Most Beautiful Code I Never Wrote by Jon Bentley, Avaya Labs Research; Finding Things by Tim Bray, Director of Web Technologies at Sun Microsystems, co-inventor of XML 1.0; Correct, Beautiful, Fast (In That Order): Lessons From Designing XML Validators by Elliottte Rusty Harold, Computer Science Department at Polytechnic University, author of Java I/O, Java Network Programming , and XML in a Nutshell (O'Reilly); and, The Framework for Integrated Test: Beauty through Fragility by Michael Feathers, consultant at Object Mentor, author of Working Effectively with Legacy Code (Prentice Hall). It also includes: Beautiful Tests by Alberto Savoia, Chief Technology Officer, Agitar Software Inc; On-the-Fly Code...
