*Great electronic book and useful one. It can be written in straightforward terms rather than difficult to understand. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

Taylor, of the State University. Measurements at various points along the Rio Grande were made by the engineers of the International (Water) Boundary Commission, and through their courtesy the results have been furnished to this Survey. AMU REGIONS. The organization of the Division of Hydrography came about through a desire for information regarding the flow of streams in the arid West in connection with the irrigation development of the country, and, as in former years, the greater portion of the appropriation for hydrographic investigations was devoted to that section. Stream measurements were continued and various reservoir sites were surveyed, and examinations were made of the possibility of diverting the large rivers. Appreciation of the results of this work is clearly shown by the numerous requests and petitions...
