Reviews

It becomes an awesome publication that I actually have actually read. It really is written in simple terms and not difficult to understand. Once you begin to read the book, it is extremely difficult to leave it before concluding.
(Talia Cormier)

ELEMENTS OF MECHANICAL DRAWING; BY ALFRED A. TITSWORTH.

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1906 Excerpt: .follows: Conceive a plane to be passed parallel to the base of the pyramid, cutting from its surface a hexagon similar to the base. In the projection on V, F is the point where this plane cuts one edge of the pyramid, FA is its projection on H. A line drawn through Fa parallel to the side of the base is the projection on H of the side of the hexagon cut from that face by the auxiliary plane. The point where the edge of the prism meets the projection of that line on H is Ch. Similarly Ah and EA may be found, (i) Draw the projection of these two surfaces on P to the right. In the projection on P, the center of the base of the pyramid is at (6.25, 1.25). CPG/) = CAGA. In the projection on H, Ah and F.h may be found more conveniently and accurately from this projection than by the method given above, thus: AAKA=ApKp and Eh KA= E, K/. (c) In the development of the pyramid, V is at (11.5, 4.25). The front face is placed symmetrically with the horizontal line in the middle of the plate. V F=V F, C F is parallel to the line of the base of that face and equals Q, Fft; A V=Ap V, EV=E, V, . BV=i V and DV=dV the true lengths, respectively, of the edges of the pyramid from the apex to the points B and...
