## 101 OBJECTS TO SEE IN THE NIGHT SKY

FIREFLY BOOKS, United States, 2014. Paperback. Book Condition: New. 208 x 147 mm. Language: English . Brand New Book. The perfect starter astronomy guide to night viewing. 101 Objects to See in the Night Sky is a fun and practical guide to identifying and observing 101 of the most fascinating and exciting sights in the northern night sky. Designed for newcomers to astronomy, the book explains what can be seen using the naked eye, binoculars or a telescope. In the book, professional astronomer Robin Scagell shows the novice astronomer where to look in the sky to see a particular object, or group of objects or sights. They may be a planet, its rings or satellites, a series of lunar craters, a constellation, asteroids, meteors, a nebula, galaxy or star cluster, for example. He describes the object in detail and gives observing tips to improve viewing skills. Informative Where to find it instructions and What you ll see explanations for each object give night sky viewers an extra hand. A concise fact file is provided for each object, and readers can award themselves points for their skill in finding the object, with higher scores given for spotting the night sky s more elusive or hard-to-see features. The book is organized by season -- winter, spring, summer, fall - - with an opening section on things you need to know, such as marker objects (for example, Sirius, the brightest star in winter s night sky) and how to use them to search beyond. It also covers such topics as asteroids and dwarf planets, noctilucent clouds, northern lights, the International Space Station, sunspots, eclipses and much more. 101 Objects to See in the Night Sky is an ideal guide for astronomy novices and classrooms.
