

Plastic forming process and die design (general higher education planning machinery and electronic materials)

Filesize: 7.67 MB

Reviews

This publication is worth getting. it absolutely was writtten very completely and useful. I am quickly could possibly get a pleasure of reading a written publication.

(Ariane Rau)

PLASTIC FORMING PROCESS AND DIE DESIGN (GENERAL HIGHER EDUCATION PLANNING MACHINERY AND ELECTRONIC MATERIALS)

[DOWNLOAD](#)

paperback. Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 406 Publisher: Machinery Industry Pub. Date :2011-02-12 version 2. This book systematically introduces the stamping metal forming process. hot forging and cold forging process of forming process and die design methods. are described the characteristics of various types of plastic forming process. process classification. process of program development. technology force calculation. mold design and equipment selection. And introduced nitrogen gas spring technology in the stamping process and die design application. This book can serve as institutions of higher learning machinery. materials engineering undergraduate and specialist materials. also available in plastic forming of metal production and research work in engineering and technical officers. Contents: Version 2 Version 2 Preface Introduction Sequence first stamping process and die design process outlined in Section I Chapter stamping stamping stamping process classification process characteristics Section II Section III Section IV stamping stamping technology development process with the first material five thought and stamping equipment exercises Chapter blanking process and die design analysis of Section II blanking blanking process and factors affecting the quality gap fourth convex III Die. die edge size Section V Section VI nesting calculation blanking process to determine the power in section VII VIII Die stamping process design and construct the basic type IX. the major part of die design and the selection criteria in section X red Section XI cutting mold design and mold design and fine blanking technology and thinking exercises Chapter bending process and die design section width of plate bending analysis of Section bending stress values ??and stress the main location of the neutral layer Section bending pieces of strain neutral layer position and bending rough calculation of the length of the fourth quarter relative to...
