Springer. Paperback. Condition: New. 281 pages. Dimensions: 9.2in. x 6.1in. x 0.7in. Socially situated planning provides one mechanism for improving the social awareness of agents. Obviously this work is in the preliminary stages and many of the limitations and the relationship to other work could not be addressed in such a short chapter. The chief limitation, of course, is the strong commitment to denying social reasoning solely at the meta-level, which restricts the subtlety of social behavior. Nonetheless, our experience in some real-world military simulation applications suggests that the approach, even in its preliminary state, is adequate to model some social interactions, and certainly extends the state-of-the-art found in traditional training simulation systems.
