Forgotten Books, 2018. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from *Insects Injurious to Young Trees on Tree Claims* In the third place, the comparative aridity of the region where these claims are located renders tree growth somewhat slower than where the precipitation of moisture is more bountiful. This slowness of growth, while it is an advantage in one respect, aids the insect foes to a considerable extent in their work of destruction. A rank and rapid growth places a tree out of danger from external enemies much more quickly than will a slow growth. At the same time, in a rank growth, a much greater amount of food is furnished for the same number of insects, and as a consequence, less injury results than if the growth were slower. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
