We are grateful to the Scientific Committee: J. L. Ericksen D. Kinderlehrer H. Brezis C. Dafermos for their dedication and hard work in developing an imaginative, stimulating, and productive year-long program. George R. Sell Hans Weinberger PREFACE Historically, one of the most important problems in continuum mechanics has been the treatment of nonlinear hyperbolic systems of conservation laws. The importance of these systems lies in the fact that the underlying equations of mass, momentum, and energy are described by conservation laws. Their nonlinearity and hyperbolicity are consequences of some common constitutive relations, for example, in an ideal gas. The I. M. A. Workshop on 'Oscillation theory, computation, and methods of compensated compactness' brought together scientists from both the analytical and numerical sides of conservation law research. The goal was to examine recent...
