The teeth, which formerly were regarded as organs totally apart from the rest of the body, are now considered as one of the most important gateways through which disease may enter. The dentist who originally held it his duty mechanically to repair diseased or lost dental tissue is now confronted with a problem the vitality of which, if he has a sincere interest in the health of his patients and in the development of his profession, demands a new study of the septic conditions of the mouth. This book is intended for the practicing dentist as well as for the student.
