

Athens Conference on Applied Probability and Time Series Analysis. Vol.1

Filesize: 8.6 MB

Reviews

It is a single of my personal favorite ebook. It really is filled with wisdom and knowledge I discovered this book from my dad and i recommended this book to discover.

(Kyla Goodwin)

ATHENS CONFERENCE ON APPLIED PROBABILITY AND TIME SERIES ANALYSIS. VOL.1

To read **Athens Conference on Applied Probability and Time Series Analysis. Vol.1** eBook, please follow the web link under and download the ebook or get access to additional information that are highly relevant to ATHENS CONFERENCE ON APPLIED PROBABILITY AND TIME SERIES ANALYSIS. VOL.1 book.

Book Condition: New. Publisher/Verlag: Springer, Berlin | Applied Probability In Honor of J.M. Gani | The Athens Conference on Applied Probability and Time Series in 1995 brought together researchers from across the world. The published papers appear in two volumes. Volume I includes papers on applied probability in Honor of J.M. Gani. The topics include probability and probabilistic methods in recursive algorithms and stochastic models, Markov and other stochastic models such as Markov chains, branching processes and semi-Markov systems, biomathematical and genetic models, epidemiological models including S-I-R (Susceptible-Infected-Removal), household and AIDS epidemics, financial models for option pricing and optimization problems, random walks, queues and their waiting times, and spatial models for earthquakes and inference on spatial models. | A. Probability and Probabilistic Methods.- Half-prophets and Robbins's problem of minimizing the expected rank.- Analysis of recursive algorithms by the contraction method.- Comparison of completely positive maps on a C - algebra and a Lebesgue decomposition theorem.- Abel expansions and generalized Abel polynomials in stochastic models.- Positive dependence orders: a survey.- B. Markov and Other Stochastic Processes.- A Poisson limit on the number of appearances of a pattern in a Markov chain.- Palindromes in random letter generation: Poisson approximations, rates of growth and Erdos-Renyi laws.- Direct analytical methods for determining quasistationary distributions for continuous-time Markov chains.- Explosions in Markov processes and submartingale convergence.- Probability bounds for product Poisson process.- On the first-crossing of a Poisson process on a lower boundary.- Explicit rates of convergence of stochastically ordered Markov chains.- Multi-type age-dependent branching processes with state-dependent immigration.- The nonhomogenous semi-Markov system in a stochastic environment.- Branching processes with two types of emigration and state-dependent immigration.- C. Biomathematical Models.- Remarks on the law of succession.- Large deviations of the Wright-Fisher process.- D. Epidemic Models.- Threshold behaviour in stochastic epidemics among households.- Reproduction numbers and critical...
