

Handbook of Magnetic Materials: Volume 14 (Hardback)

Filesize: 6.78 MB

Reviews

This type of publication is every thing and got me to seeking in advance plus more. I was able to comprehended every thing out of this created e book. I am easily could possibly get a satisfaction of reading a created ebook.
(Sonya Koss)

HANDBOOK OF MAGNETIC MATERIALS: VOLUME 14 (HARDBACK)

To save **Handbook of Magnetic Materials: Volume 14 (Hardback)** PDF, make sure you follow the hyperlink under and download the ebook or gain access to other information that are have conjunction with HANDBOOK OF MAGNETIC MATERIALS: VOLUME 14 (HARDBACK) ebook.

ELSEVIER SCIENCE TECHNOLOGY, United States, 2002. Hardback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Magneto-electronics is a novel and rapidly developing field. This new field is frequently referred to as spin-electronics or spintronics. It includes spin-utilizing devices that need neither a magnetic field nor magnetic materials. In semiconductor devices, the spin of the carriers has only played a very modest role so far because well established semiconductor devices are non-magnetic and show only negligible effects of spin. Nanoscale thin films and multilayers, nanocrystalline magnetic materials, granular films, and amorphous alloys have attracted much attention in the last few decades, in the field of basic research as well as in the broader field of materials science. Such heterogeneous materials display uncommon magnetic properties that virtually do not occur in bulk materials. This is true, in particular with respect to surface (interface) magnetic anisotropy and surface (interface) magnetostrictive strains and giant magnetoresistance. The local atomic arrangement at the interface differs strongly from that in the bulk. The local symmetry is lowered, so that some interactions are changed or are missing altogether. The interface atoms may be envisaged as forming a new phase and some properties characteristic of this phase may become predominant for the entire system. This becomes particularly evident in the case of interfacial magnetostriction which can lead to a decrease (almost to zero) or to an increase (over the bulk value) of the resulting magnetostriction of the nanoscale system. There are various forms of the interplay of magnetism and superconductivity, which can be divided into competition and coexistence phenomena. For instance, a strong competition is found in high-T_c cuprates. In these materials, depending on the doping rate, either Neel-type antiferromagnetism moments (e.g. from 4f-elements) with superconductivity is known to occur in systems where the concentration of...
