

The Epidermal Cells of Roots: A Dissertation Submitted to the Faculty of
the Ogden Graduate School, of Science in Candidacy for the Degree of
Doctor of Philosophy (Department of Botany) (Classic Reprint)
(Paperback)

Filesize: 7.51 MB

Reviews

This pdf is very gripping and fascinating. We have read and that i am certain that i am going to going to read once more again in the future. Once you begin to read the book, it is extremely difficult to leave it before concluding.

(Burnice Cronin)

Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from The Epidermal Cells of Roots: A Dissertation Submitted to the Faculty of the Ogden Graduate School, of Science in Candidacy for the Degree of Doctor of Philosophy (Department of Botany) Contact. - The effect of contact has received some attention. Schwarz (20) observed that water roots upon entering the sub stratum develop hairs, and that when the soil is saturated the hairs on corn seedlings disappear, although soil particles are still present, and suggests that it may be due to chemical stimuli or retardation of growth, since it could not be due to contact. Pfeffer (18) denies that contact is a factor, for he found that on climbing roots hairs were produced on the side near the support where there is the greater moisture. Snow (21) grew corn seedlings between plates and found no hairs on the sides touching the plates, while there were hairs on the other two sides; but again moisture may be the limiting factor and not contact. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
