FEDERAL INFORMATION SECURITY MANAGEMENT ACT (PAPERBACK)

Createspace, United States, 2015. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.As cyber threats continue to evolve, the Federal Government is embarking on a number of initiatives to protect Federal information and assets and improve the resilience of Federal networks. OMB, in coordination with its partners at the National Security Council (NSC), the Department of Homeland Security (DHS), and other agencies, helps drive these efforts in its role overseeing the implementation of programs to combat cyber vulnerabilities and threats to Federal systems. Today, as required by the Federal Information Security Management Act of 2002 (FISMA), OMB is sending to Congress the annual report that tracks the progress of our efforts while also identifying areas of needed improvement. Agencies take a number of actions to protect government networks and information, implementing tools and policies in order to mitigate potential risks. The fiscal year (FY) 2014 FISMA report provides metrics on Federal cybersecurity incidents, the efforts being undertaken to mitigate them and prevent future incidents, and agency progress in implementing cybersecurity policies and programs to protect their networks. FY 2014 proved to be a year of continued progress toward the Administration's Cybersecurity Cross Agency Priority (CAP) Goal, which requires agencies to Know Your Network (Information Security Continuous Monitoring), Know Your Users (Strong Authentication), and Know Your Traffic (Trusted Internet Connection Consolidation and Capabilities).
